Game Developer | Digital Game Design Student

As a digital game design student, I continuously strive to improve myself in the field of game development. I am proficient in writing clean and sustainable code that adheres to SOLID principles and effectively utilizes design patterns in the projects I develop with Unity. I am passionate about providing creative solutions while working both independently and in teams. In my projects, I particularly focus on game architectures, performance optimization, and game mechanics.

Education

Bachelor's Degree: Mugla Sitki Kocman University, Computer Engineering
(September 2021 – January 2026)(3th Year)

Experience & Skills

Experience :

Technical Skills : C#, C++, JavaScript, Unity, Game Design & Development, Programming Patterns, SOLID Principles, Performance Optimization, Project Management with GitHub, Game Mechanics and Animation Systems

Technologies and Platforms: Visual Studio, Visual Studio Code, Git, GitHub, Unity
